FRONT-END DEVELOPER

➔ **I'm skilled at delivering pixel perfect UI design implementation and developing user-facing web apps that are user-friendly, fully responsive, reusable, maintainable, and scalable.**

➔ **I actively try my hands on new technologies, and I'm driven to stay up-to-date with emerging trends and advancements. However, I enjoy building things with Javascript as well as React and other React helper tools/frameworks.**

➔ **Committed to providing(new) and improving(existing) real time tech solutions for real life problems.**

SKILLS

➔ Solid knowledge of modern building blocks (HTML5, CSS3 and ES6 JavaScript)

➔ Decent understanding on building reusable UI components and SPA(s) with ReactJs

➔ Robust experience with styled components, Chakra-UI, Material-UI

➔ Familiar with state management Libraries like ReduxJs and Context API

➔ Static type checking with Typescript

EXPERIENCE

DOSH Services, Nigeria — *Frontend Developer*

January 2020 - Present

FILL_IT Tech, UK — *Frontend React Engineer*

October 2020 - March 2020

HNG Internship, Nigeria —*Frontend Developer*

JUNE 2020 - AUGUST 2020

➔ Collaborated with over 7,000 interns in building envato themes, static pages and fullstack web apps.

➔ Implemented pixel perfect Figma UI designs for Three months.

➔ Worked with over 400 interns on building FundMyLaptop . A B2C crowdfunding platform to get quick loans to sponsor the purchase of a new laptop. Payback plan and options are available

➔ Collaborated with 10 interns to build a web app that registers interns for a virtual internship-

ZURI APP; This project broadened my skills by working with EJS - a JavaScript template engine
[Here's the deployment link we used for testing](#)

➔ Built the landing page for a futuristic app, during the frontend challenge week - SAFECHILD APP. It came out No.34 out of 400 submissions [Here's the link](#)

➔ Contributed to value addition + Income generation projects; one of which my team created tech-subjected youtube videos which pulled over a total of 8,000 views in two days.

codeHouseNG — *Frontend Developer intern*

DECEMBER 2015 - APRIL 2016

➔ A coding bootcamp where I learnt the fundamentals of Front-end development. I was introduced to about a hundred beginner and intermediate algorithms and data structures

➔ Built a TIC TAC TOE game https://codepen.io/nwachukwu_emmanuel/full/LNgjVQ

➔ Built a Pomodoro Clock https://codepen.io/nwachukwu_emmanuel/full/YqJxVR

EDUCATION/ CERTIFICATIONS

Education:

Obafemi Awolowo University - Ile-Ife, Osun state, Nigeria [2015 - 2020]

➔ Relevant courses includes Computer Programming(Java I, Java II), Data Structures and Algorithms - Distinction in both semesters

➔ Extra Curricular: Guiding and helping newbies through the freecodecamp's curriculum

Technical Courses:

Udemy Course - The Advanced web developer bootcamp   [AUG 2019 - DEC 2019]

Udemy Course - The web developer bootcamp   [MAY 2018 - AUG 2018]

Freecodecamp - JavaScript Algorithms and Data Structures   [FEB 2017 - APR 2017]

Freecodecamp - Responsive web design   [JAN 2016 - MAR 2016]
